RE: In the Matter of Internet-Based Telecommunications Relay Service Numbering,  
WC Docket No. 10-191

Dear Ms. Dortch:

On May 4, 2011, Paul LaGattuta, Brian Rosen, Ryan Karnas and I on behalf of NeuStar, Inc. ("Neustar") met with Bill Dever, Carol Simpson, Heather Hendrickson, Rich Hovey, Gary Remondino and Myrva Charles of the Wireline Competition Bureau for a quarterly meeting regarding the Internet-based Telecommunications Relay Service ("iTRS") Telephone Numbering Directory ("directory"). During the course of the meeting there was a brief discussion of Neustar's proposal to link toll free numbers to their respective users' geographically appropriate ten digit telephone numbers in the iTRS Directory. Commission staff asked about Sorenson's concern that it would have to modify its systems. Neustar explained that its solution followed standard DNS practices, that any changes to provider's systems should be minor and that it is the best way to ensure that a toll free number follows a user when the geographic telephone number is ported.

The Commission staff also asked that Neustar place in the record of this proceeding the number of geographically appropriate telephone numbers and the number of toll free telephone numbers associated with Video Relay Service ("VRS") in iTRS directory in March of 2010 and in March of 2011. In March of 2010, there were 230,434 geographically appropriate telephone numbers and 108,810 toll free telephone numbers associated with VRS in the iTRS directory. In March of 2011, these numbers were 238,762 and 118,297, respectively.

Sincerely,

A handwritten signature in dark ink, reading "Richard L. Fruchterman, III". The signature is fluid and cursive, with a large, stylized "R" at the beginning and a circular flourish at the end.

Richard L. Fruchterman, III  
Sr. Regulatory and Public Policy Counsel
